

New Media Trainings!

RPV is excited to announce a series of New Media Workshops designed to kick our online effort into high gear for the final stages of this year's crucial elections. These workshops, led by members of RPV's New Media Committee, are intended to educate our core activists on why new media efforts are so important, and how they can harness new tools to become more effective at organizing their activities, recruiting new party members, and electing Republican candidates! These sessions come at a crucial time during our statewide elections when we need every Republican out there helping win the message wars online and mobilizing other Republicans to work for Victory in November.

The workshops will walk Republican activists through the ins-and-outs of political blogs, give step-by-step instructions on how to use social media such as Facebook, Twitter and YouTube and focus on the practical value of new media in helping to win elections. The New Media Committee hopes that you or your designee will be able to attend! This is an invitation-only event designed for members of State Central, Unit Chairs and local GOP committee members. We have asked the Unit Chairs to send this email invitation to the members in good standing of their committee. If you know of any non-members that should be invited, please let me know.
